Open & Short Courses

With over 100 open training courses a year, mostly run at several venues in Essex and other parts of the UK, the open training courses format is the most cost-effective way for individuals and small groups to access our face-to-face learning.

In-House Staff Training

This option allows for greater tailoring of content and flexibility of delivery, as well as being the most cost-effective format for groups of seven or more. We design, develop, deliver, certificate and evaluate in-house training throughout England and Wales, and can also host organisations at our partners venues in the United Kingdom and overseas.

Bespoke commissions are possible and usually do not incur additional cost as we welcome all opportunities to add to our portfolio of courses.

Training can be arranged for:

- Nursing Homes
- Residential Homes
- Hospices
- Hospitals
- General Practices
- Special Schools
- Pharmacies
